

PRODUCT SHEET

GESMATIK KIOX

Order Terminal

FUNCTIONALITIES

The KIOX Ordering Terminal or Kiosk brings GESMATIK functionalities directly where they're needed, making it an ideal complement to industrial vending machines and smart lockers.

Customizable to Fit Each Company's Needs, the KIOX Kiosk offers:

- User registration.
- Profile definitions (product restrictions, usage limits).
- Product configurations (descriptions, references, pricing, product sheets, images, virtual catalogs, and more).
- Additional options (...).

The GESMATIK KIOX System manages the distribution of essential work materials.

The module connects to the internet via SIM card, enabling comprehensive, real-time control of machine activity—on-site or remotely through a computer or smartphone.

BENEFITS FOR ALL DEPARTMENTS OF YOUR HEALTHCARE FACILITY

Workers / Users

Orders to warehouse from where they are needed! 1. The user logs in at the control module using their card or access code and selects the product they need. The machine displays the items authorized for the user. The user confirms the order that is received by the warehouse.

Management, Purchasing, OHS, Quality

Efficiency, savings, traceability, compliance with the Occupational Risk Prevention Law.

The GESMATIK software integrated into the KIOX kiosk provides full traceability of products and processes by recording when, who, and which product was requested by the worker. Advanced **SIGNED** Function: enables the digital signing of acknowledgments for PPE receipts.

Software Administrator

Parameter Modification and Creation of Statistics and Reports from any computer. ERP integration is supported.

The GESMATIK software administrator can adjust product authorizations for users, set restrictions or limits on the quantity of each item or item groups, and manage user profiles by adding, removing, or editing users. Additionally, the administrator can set stock depletion thresholds.

Warehouse Manager / Industrial Supplier

Streamlined Delivery Management

For internal deliveries, the warehouse manager is informed of the specific items to be distributed. If the supplier operates this new sales channel, they receive the order directly, saving the client from the ordering process altogether.
